

# UNICELL

Products for Your Entire Pharmacy

Adaptive. Versatile. Designed to Your Needs.

In today's ever changing pharmacy environment Unicell flexible pharmacy products provide a way to meet your ever changing needs without major expense or renovations. Easily handling changes such as adding new medications, new staff additions, converting to a unit dose system or setting up a satellite pharmacy in another area.

We understand that reducing medication errors is a primary concern for every pharmacy. Unicell's easy to configure pharmacy products address your specific requirements for workflow, storage, transport and dispensing. Our ergonomically sound pharmacy environments are designed to easily adapt to your changing needs and Unicell will work with you and your team to create it.

## Administrative Functions

Modular components make it easy to reconfigure your environment to support changing equipment, staff and technologies.

## Distribution Functions

Unicell makes it easy for staff to identify, retrieve and deliver supplies and medications effectively and efficiently so that you can create efficient user friendly workspaces that adapt with your changing needs. Our modular storage and cart system provides you with the storage for the supplies and materials you need throughout the entire pharmacy and Hospital.

## Materials Management

Unicell systems consist of a series of high-strength, structural-molded cells in mix-and-match sizes which provide ample storage capacity. Unicell can be configured to meet any materials storage requirement with interchangeable trays, drawer fronts, inserts, dividers, shelves, bins, baskets, hinged or lift doors with or without locks and bi-level doors.
