

## UNICELL® Storage Cell QuickFacts

All cells are one-piece molded construction, structural polystyrene with a urethane coating

The structural polystyrene is 100 % recyclable

The high performance polyurethane coating on the cells provides outstanding physical and chemical resistance

The low pressure foam molded polystyrene provides structural strength, rigidity and light weight characteristics

Cells will not dent, rust, or rot

The structural polystyrene construction enables easy attachment of accessories

Modular design assures total flexibility when reconfiguring workspace

Cells are available in 5 mix and match sizes

All cells have molded in-place provisions for wall mounting as well as casters, and can be converted from mobile to static use, and back

Hanging key can be mounted at 4 different positions for adjustable cell height when wall mounted

Unique one-piece construction ensures the easiest cleaning and sterilization on the market

All interior & exterior corners are rounded, and there is a total lack of seams where bacteria and microbes can hide

Cells can be disinfected in automated cart washers to 180F

The molded in-place, integrated drawer guides, has positive stops to prevent accidental pullout

Unicell mobile cells are equipped with 5" non-marking thermoplastic casters, and in combination with light weight, superior strength structural foam construction provides for easy mobility

Cells come in 3 standard colors, and drawer fronts in 20 accent colors

Custom colors available for higher quantity orders

Unicell cells, drawers and trays are covered by a Lifetime warranty as outlined in the Unicell Warranty Certificate

UL/Greenguard certified for low emitting products and materials
